Civil Litigation Refresher 2023

A successful civil litigation practice requires a solid foundation of core skills, superior file management practices, and the ability to not only respond but also anticipate challenges that may come your way. Our presenters provide you with the tools to do just that, as they guide you through the essentials of the client relationship, drafting best practices, the trial process, and more. You also receive practical strategies to expertly manage and build your practice. Whether you are starting out or looking for a solid refresh of basic principles, this is the program for you.

- Discuss the implications of artificial intelligence on the litigation process
- Understand mode of proceeding and default hearing requirements
- Gain insight into drafting considerations
- Learn best practices when preparing a plan for effective examinations for discovery
